

## Home Page

Your Home Page introduces your business and your website.

Let your customers know why they should explore your site.

A business home page is similar to the front window of a retail business. Highlight your best products or services and any special offers. Present your products or services value to visitors to get them want to navigate through your website.

**Convince customers of your site's value to them!**

Consider what you might say to people to keep them coming back. You might mention how long you've been in business and how you show your commitment to customers. Be sure to tell visitors about your approach to business, your values, and your abilities.

## About Us

About Us is the page where you write more detail about your company and business. Focus on your strongest points, whether history, licenses, or awards.

This page should include information such as your company history, certifications, licenses, insurance and bonding, awards, the professional experience of the founders or key employees, and other important details not included on other pages. You may want to include a picture of yourself or your staff.

### Company History

Tell visitors about your company's history, including location and ownership, personal experience, and other information that will help people remember you. Keep this information brief but informative.

### Customer Testimonials

What do your customers have to say? Consider using some space to tell the story of the business through your customers' voices. Their word is more powerful than anything you can say for yourself.

## Contact Us

Place your preferred methods of contact on this page.

Let your customers know how to contact you all in one place:

Company Name  
Address  
City, State, Zip Code  
Phone Number  
Fax Number  
Email Address

If email is your preferred method of contact, you may want an email contact form for visitors' convenience in contacting you with questions about your services.
